Biggest Movers over the month in local currency – Top 3 and Bottom 3 Performers

Stock Name	Performance in Month	What Happened
LHC Group	+19.62%	Announced a \$250m share buyback. Stock bounced after four very tough months performance-wise.
Grand Canyon Education	+18.27%	Early repayment of large loan from Grand Canyon University raised expectations of a major share buyback and potentially higher dividend.
Centene	+15.39%	No company-related news but stock highlighted as "best idea" by a larger broker.
HelloFresh SE	-24.45%	Market took profits after the capital markets day made clear that 2022 will be an investment year (higher capex and costs) to prepare the company for continued strong profitable growth.
First Solar	-15.87%	Uncertainty around the ratification of the \$1.7tr Build-Back-Better act in the US, which includes strong support for renewable energy, hit higher valued solar and wind stocks.
SolarEdge Technologies	-14.40%	Uncertainty around the ratification of the \$1.7tr Build-Back-Better act in the US, which includes strong support for renewable energy, hit higher valued solar and wind stocks.

Footnotes and important risk warnings

¹The average holding period is calculated by WHEB in accordance with the requirements of the UCITS V directive, and derived from fund turnover over the last 12 months as of the end of the reporting month. This calculation method can result in very long reported holding periods when most of the trading volume is explained by subscriptions and/or redemptions, and can even result in a negative portfolio turnover figure when subscriptions and redemptions exceed purchases and sales. As of 31 December 2021 the UCITS holding period based on the UCITS methodology was 19.73 years. During periods when the resulting figure is negative or more than 100 years, we will report the outcome here within the footnotes and not on the front page of this factsheet to avoid the risk of presenting a confusing figure.

²Tracking error refers to the 5 year ex-post volatility from the average of excess returns of the Reference Portfolio vs the MSCI World Index.

³Active Share refers to the % overlap between the Fund and MSCI World Index weightings. Data as at 31 December 2021, source: Factset.

⁴Data for Theme Breakdown, Geographic and Market Capitalisation allocations are provided by FactSet. Small differences in cash percentage figures may arise.

⁵The MSCI World Index is quoted at month end with net dividends reinvested and without the deduction of any expenses (in contrast to the portfolio). Index data are provided by MSCI Barra via Bloomberg, calculated on an unhedged US dollars. Returns may increase or decrease as a result of currency fluctuations.

⁶The Reference Portfolio is the FP WHEB Sustainability C Acc Primary Share Class (USD) calculated net of fees on a midday to midday basis. This may mean there are discrepancies between the fund and the reference portfolio performance due to market movements after the midday cut-off. The share class was launched in October 2018. Prior to this date, the reference share class is the FP WHEB Sustainability C Acc Primary Share Class (GBP) converted into USD.

⁷Ongoing Charges and Fees reduced as of 1st January 2022.

Risks include: the value of units in WHEB Sustainable Impact Fund ("Fund") may increase or decrease and you may not get back the amount originally invested, for reasons including adverse market and foreign exchange rate movements. Past performance does not predict future returns. The Fund invests in equities and is exposed to price fluctuations in the equity markets, and focuses on investments in mid-sized companies in certain sectors so its performance may not correlate closely with the MSCI World Index (the Fund's benchmark). For full risks and investor rights, please see fund prospectus available in English on <https://www.whebgroup.com/investment-strategy/fund-options/wheb-sustainable-impact-fund/>. The arrangements for marketing may be terminated under the Cross-Border Distribution Directive notification process.
